Types and Treatments:

Consent for Examination including Dilating Eye Drops:

I hereby consent to such examination procedures as in the judgment of my physicians may be considered necessary or advisable as long as I am a patient of DR STROH / EMSMDPC / RCLI. I accept that my treatment and care may be observed and/or aided by physicians and/or other assistants under supervision. I hereby authorize physicians and/or their assistants to administer dilating eye drops to me as long as I am a patient of DR STROH / EMSMDPC / RCLI. Dilating drops are used to dilate or enlarge the pupils of the eye to allow the physician to get a better view of the inside of your eye, they may blur vision for a length of time which varies. It is not possible for your physician to predict how much your vision will be affected. **Because walking or driving may be difficult immediately after your examination, you should be prepared to have an assistant or driver in case you feel you are unable to walk or drive safely.** Adverse reactions, such as acute angle-closure glaucoma, may be triggered by dilating drops rarely and is treatable with immediate medical attention.
